This leaflet answers some common questions about Foban Hydro Cream. It does not contain all the available information. It does not take the place of talking to your pharmacist or doctor.

All medicines have risks and benefits. Your pharmacist or doctor has weighed the risks of you taking Foban Hydro Cream against the benefits they expect it will have for you.

If you have any concerns about this medication, ask your pharmacist or doctor.

Keep this leaflet with the medication. You may need to read it again.

What Foban Hydro Cream is used for

Foban Hydro Cream is used for inflammatory skin infections (eczema or dermatitis) and also infections caused by germs (bacteria).

How Foban Hydro Cream works

Foban Hydro Cream contains the active ingredients fusidic acid and hydrocortisone.

Every gram of cream contains 20 mg of fusidic acid and 10mg of hydrocortisone.

Fusidic acid is an antibiotic that provides antibacterial activity against most germs (bacteria) on skin.

Hydrocortisone is a type of corticosteroid (steroid) that helps to reduce swelling, itching, redness.

Ask your pharmacist or doctor if you have any questions about this medicine.

Before you use Foban Hydro Cream

When you must not use it

Do not apply Foban Hydro Cream if:

- You are hypersensitive to any of this medicine's ingredients. You can find a list of these ingredients in section 8 of this leaflet.
- You have viral skin infections, tuberculosis (lung infection), chicken pox, fungal skin infections, and skin conditions caused by syphilis and eruption following vaccination.

Before you start to use it

Tell your pharmacist or doctor:

- If you have an infection on your skin and specify the infected area.
- If you are using any other prescribed medicines or non-prescription medicines or skin products.

Precautions/Warnings:

- Take special care if you use Foban Hydro Cream on the face. The cream should not be applied near the eye because it can lead to glaucoma if it gets into the eye.

- Do not use Foban Hydro Cream for a long time or in large amounts especially on infants as it may make the chance of getting any side effects higher.
- Do not use for more than 7 days if your skin has not improved after using Foban Hydro Cream.

Pregnancy and breast feeding:

- Ask your doctor or pharmacist for advice before taking this medicine if you are pregnant or breast-feeding.
- This medicine should not be used extensively, in large amount or for long periods if you are pregnant.
- Safety of its use during pregnancy and lactation has not been established.
- Do not apply on the breast prior to nursing.

Taking other medicines

Tell your pharmacist or doctor if you are taking any other products (such as over the counter medicine, prescribed medicine and herbal products).
