What Apollo Cream is used for

Apollo Cream is used for relief of itching and pain, due to minor burns, insect and mosquito bites, minor skin irritations, rashes, shaving, pimples, scrapes and abrasions. Apollo Cream also contains antiseptic to help prevent bacterial contamination skin infection.

How Apollo Cream works

Apollo Cream contains cetrimide, camphor, and menthol as active ingredients. Camphor reduces pain and skin irritation. Cetrimide is an antiseptic which help to prevent skin infection. Menthol provides the cooling sensation.

Before you use Apollo Cream

- When you must not take it
Do not use Apollo Cream if you are allergic to cetrimide, camphor, menthol or any of the ingredients listed at the end of this leaflet.

Do not use this product for children under 2 years of age. It is very dangerous to place any camphor containing product into the nostril of children as there is possibility to cause breathing to stop temporarily towards them.

Do not use on broken skin.

It is not advisable to use it repetitively or as long term application to the skin. It might cause allergy to take place.

Avoid contact with eyes.

Do not use in body cavities since it contains cetrimide.

Do not use this medicine after the expiry date printed on the pack or if the packaging is torn or shows signs of tampering.

If it has expired or is damaged, return it to your pharmacist for disposal.

If you are not sure whether you should start using this medicine, talk to your doctor.

- Before you start to use it
Tell your doctor if you have allergies to any other medicines, foods, preservatives or dyes.

- Taking other medicines
Tell your doctor if you are taking any other medicines, including medicines that you buy without a prescription from your pharmacy, supermarket or health food shop.

Some medicines may interact with Apollo Cream. However, no specific interactions with

Apollo Cream are known at this time.

Your doctor or pharmacist has more information on medicines to be careful with or avoid while using Apollo Cream.

How to use Apollo Cream

Follow all directions given to you by your doctor or pharmacist carefully. They may differ from the information contained in this leaflet.

If you do not understand the instructions, ask your doctor or pharmacist for help.

- How much to use
Apply to the affected area when needed. Use enough to provide relief and reapply as needed.

- When to use it
Use Apollo Cream as needed.
