What Anasma Syrup 2 mg/5 mL is used for

Anasma Syrup 2 mg/5 mL is indicated for asthma, chronic bronchitis, obstructive lungs disease and other chronic lungs disorders.

How Anasma Syrup 2 mg/5 mL works

It contains salbutamol, which works by relaxing the muscles of the airways of the lungs, and facilitates in breathing.

Before you use Anasma Syrup 2 mg/5 mL

Anasma Syrup 2 mg/5 mL should not be used in patients with known allergy to salbutamol.

This medicine should be used carefully in patients with medical problems such as:

1. Heart disease
2. Diabetes mellitus
3. Enlarged prostate
4. Excessive thyroid hormone

Please inform your doctor if you are taking other medicines, especially:

1. Guanethidine, reserpine or methyldopa (for high blood pressure)
2. Monoamine oxidase inhibitors e.g. tranylcypromine (for depression)
3. Tricyclic antidepressants eg. amitriptyline (for depression)
4. Corticosteroid
5. Theophylline (for breathing problems)

How to take Anasma Syrup 2 mg/5 mL

How much to take

Always take Anasma Syrup 2 mg/5 mL exactly as your doctor's advice. If you are unsure, do check with your doctor or pharmacist.

Doses:

Adults : 2-4 mg (5-10 mL) three or four times a day. Your doctor may increase this gradually up to a maximum of 8 mg (20 mL) three or four times a day. Children (2-6 years) : 1-2 mg (2.5-5 mL) three or four times a day.

Children (above 6 years) : 2 mg (5 mL) three or four times a day.

When to take it

Take 1 hour before or 2 hours after meal.

How long to take it

Do not stop taking this medicine even when you feel better, unless being advised by your doctor.

If you forget to take it

If you miss a dose of Anasma Syrup 2 mg/5 mL, take it as soon as possible. However, if its due for the next dose, skip the missed dose and continue with your regular dosing schedule. Do not double up the doses.

If you take too much (overdose)

If you have taken more than the prescribed dose, contact your doctor immediately. Signs of an overdose are chest pain, severe dizziness, prolonged headache, severe increase in blood pressure, continuous urge to or vomiting, unusual nervousness or restlessness and muscle twitching.

While you are using Anasma Syrup 2 mg/5 mL

Check with your doctor at once:

1. If you still have trouble in breathing 1 hour after using this medicine.
2. If your symptoms return within 4 hours after taking this medicine.
3. If your condition gets worse.

Side Effects

Frequent incidents are urge to vomit, nervousness, trembling, and unusually fast or pounding heartbeat. Urination, dizziness or lightheadedness, dryness or irritation of the mouth and throat, headache, heartburn, increase or decrease in blood pressure, restlessness, trouble in sleeping, unusual taste in mouth and vomiting may occur less frequently.

Usage during pregnancy and lactation should be considered based on risk benefit.

How to store and dispose

Storage

Store below 25°C, away from direct light. Keep out of the reach of children.

Disposal

Do not dispose the medicine into wastewater or household garbage. Ask your pharmacist on the disposal of medicines.
