What Selmax 325mg Capsule is used for
Selmax 325mg Capsule is used for the relief of fever and pain associated with cold and flu, headache and body aches.

How Selmax 325mg Capsule works

Selmax 325mg Capsule contains Paracetamol which belongs to a group of medicines called analgesic and antipyretic that helps to ease pain and reduce fever.

Before you use Selmax 325mg Capsule

- When you must not take it

Do not take this product if you are allergic (hypersensitivity) to Paracetamol or any other ingredients in this product.

- Before you start to use it

This medicine should be given with care to patients with liver or kidney problems, alcohol dependence, and to patients taking other drugs that affect the liver.

- Taking other medicines

You should always check with your doctor if you or your child are taking any other medicines, especially:

- Anticoagulant medicines e.g. Warfarin (blood thinning medicine)
- Metoclopramide (medicine to help with emptying the stomach)
- Propantheline (medication to treat peptic ulcers)
- Certain types of medicines for depression and pain killers Chloramphenicol (antibiotic)
- Enzymes such as alcohol and seizure medicines
- Probenecid (medication to treat gout)
- Colestyramine (medication to reduce cholesterol)

How to take Selmax 325mg Capsule

- How much to take

Adults and children above 12 years:

Take 2 capsules 3 to 4 times daily or when necessary. (Do not exceed 8 capsules a day)

Children 6 to 12 years:

Take 1 capsule 3 to 4 times daily or when necessary. (Do not exceed 4 capsules a day).

Do not exceed the recommended dose unless advised by a doctor.

- When to take it

May be taken with or without food.

- How long to take it

Seek medical consultation if fever persists for more than 3 days or pain persists for more than 10 days or if there is redness.

- If you forget to take it

If you forget to give Selmax 325mg Capsule to your child, give it as soon as you remember. Never double up on the next dose to make up for the one missed.

- If you take too much (overdose)

Symptoms include vomiting, abdominal pain, hypotension and sweating.

In case of overdose, prompt specific treatment is essential.

Call National Poison Centre (1800 888 099) or your doctor or go to the accident and emergency centre at your nearest hospital immediately.

While you are using Selmax 325mg Capsule

- Things you must do

If fever persists for more than 3 days or pain persists for more than 10 days or if there is redness, please consult a doctor.

- Tell all the doctors, dentists and pharmacists who are treating you that you are taking Selmax 325mg Capsule.

- Things you must not do

Do not take this product to treat any other conditions unless it has been prescribed by your doctor.

- Things to be careful of

This preparation contains paracetamol. Do not take any other paracetamol-containing medicines at the same time.

Side Effects

Allergy alert: Paracetamol may cause severe skin reactions. Symptoms may include skin reddening, blisters or rash. These could be signs of a serious condition. If these reactions occur, stop use and seek medical assistance right away.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by calling Tel: 03-78835549, or visiting the website npra.moh.gov.my [Public → Reporting Side Effects to Medicines (ConSERF or Vaccines (AEFI))].

Storage and Disposal of Selmax 325mg Capsule

- Storage

- Store below 30°C.
- Protect from light and moisture.
- Keep container tightly closed.
- Keep out of reach of children.

- Disposal

Do not take this product after the expiry date. An expiry date is printed on the label of the medicine.

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
